NEW FLOWERING BEGONIA
"GRACILIS LUMINOSA".
FOR DESCRIPTION AND PRICE
SEE PAGE TWO OF COVER.

Mc GREGOR'S FLORAL GEMS.
FOR AUTUMN OF 1902.
The Newest Begonia,  
“Gracilis Luminosa”  
(Illustrated on front page of this book)

THIS beautiful New Begonia is the latest novelty in the Begonia family. As the name implies, it is one of the most symmetrical and yet graceful plants we have ever grown, very strong and robust, but still keeping its shape so as to make a very attractive winter house plant. This year is the first time this grand new Begonia has been offered in this country to the public. Its foliage resembles a little that grand old variety, *Vernon*, rich glossy green, often shaded deep bronze. It begins flowering during the summer months, and is a mass of bloom all through the winter. The flowers, when first opening, are a bright cherry, changing to a clear coral red. It thrives everywhere, and is destined to become a leader among all the Begonias. *Price, strong plants, 25 cents each.*

The Four Best Geraniums  
ESPECIALLY GROWN FOR WINTER FLOWERING  
(Illustrated on back of this book)

*Price, 15 cents each; the four varieties for 50 cents*

**No. 1. Fleur Blanc**
A new Geranium of the large flowering type and one that has proved to be a fine winter bloomer. Flowers purest white; not a trace of coloring at the center. Very free flowering, always a perfect mass of white. Plant dwarf and bushy.

**No. 2. Miss Francis Perkins**
New and extra fine, large bold flowers; clear bright pink; immense bloomer and one of the best pot winter flowering Geraniums we have ever grown.

Your order will not be complete without a set of these Four Winter Flowering Geraniums.

The Four Leading Giant Cyclamens  
“The Persian Violet”  
(Illustrated on back of cover)

THIS genus contains some of our most popular and desirable plants for fall and winter and early spring flowering. They are all neat and dwarf in habit; all have foliage of pretty form and beautiful markings, and the flowers in every case are beautiful, some exquisitely so. The Cyclamen does not need an intense heat, but thrives better in a rather cool, moist atmosphere. The bulbs should be potted in a light, loamy soil with plenty of drainage. The flower, as the name implies, is very similar in form to the large single violet, but producing from one bulb as many as fifty flowers. There are a great many colors in all, but we have picked four of the best, as are described below, which we guarantee to give the finest and largest number of flowers.

**Cyclamen Giganteum Albo Rubrum**  
(white, with red eye, as illustrated)

**Cyclamen Giganteum Roseum Supurbum**  
(pink, with dark eye)

**Cyclamen Giganteum Album**  
(pure white)

**Cyclamen Giganteum Sanguinea**  
(dark red)

*Price, nice young plants, 15 cents each; four for 50 cents.*

Large size plants, for immediate blooming, 30 cents each; four for $1.00.

THE NEW "CHRISTMAS" COLLECTION
14 LARGE BULBS, SENT POSTPAID FOR 50 CENTS.

After careful testing, consultation with our Holland bulb growers, and painstaking study, we have succeeded in forming a collection of winter-flowering bulbs, which can easily be brought into bloom at Christmas time by any amateur. This collection will give you a window garden full of brilliant, fragrant and delicate flowers for several weeks. Buy the bulbs early in the fall, and plant them at once in pots or boxes. Water them abundantly immediately after planting, cover the tops of the pots with leaves or excelsior and place in a dark closet or cellar for four or five weeks until the roots are well grown. Bring them out to a sunny window three or four weeks before the blooms are desired, as the tops will grow strong and rapidly after the roots are well grown.

These directions apply to the Hyacinth, Tulips and Narcissus, but for the Chinese Sacred Lily see directions on page 12.

For $3.50 we will send by express (purchaser paying the charges) 100 Hyacinths in any color or colors, single or double, which will make a bed of fifteen feet in circumference or five feet in diameter composed of five rows planted six inches apart. If your bed should be of another shape or larger, and would require more than 100, we will offer them at the same rate.
Fine Named Single Hyacinths

PRICE, YOUR SELECTION, 10 CENTS EACH

The Single Hyacinths by many are not so highly thought of as the double, yet they are to be preferred for bedding, as the truss is not so heavy, and consequently does not fall over, but stands erect. While the individual single bells are not quite so pretty as the double, the grace of the erect truss makes it better for pot culture also. We have revised our list, and can safely say we offer you the cream of Single Hyacinths now grown.

New List of Choice Varieties

SINGLE PURE AND TINTED WHITE

La Belle Blanchoiseuse—Extra large waxy-white bells; an excellent variety and choice for cemetery planting.

**EARLY TULIPS**

Tulips are the most satisfactory of spring flowering bulbs. They are extremely hardy and of easy culture, blooming as freely and producing as fine flowers in a confined town garden as in a more favored place. Double and Single Tulips, when associated together and planted in front of shrubs, maintain a longer display than if either are separately planted. One of the prettiest ways to plant them is in the sod next the foundation of the house, where they will come up and bloom year after year with no care.

All the varieties named below are well adapted for bedding and pot culture, especially the Duc Van Thol sorts, which can be forced into bloom by Christmas with very little trouble.

GLORY OF THE SNOW

Chionodoxa Luciliae—One of the most lovely hardy flowering spring bulbs, producing lovely azure-blue flowers with pure white center. It is one of the earliest of all flowers, blooming before the Crocus. Price, two for 3 cents, 15 cents per dozen, $1.25 per hundred, by mail.

SNOWDROPS

These are the first flowers to greet us in the spring, their pretty drooping snow-white blossoms appearing in March, a few days ahead of the Scilla Siberica, with which they form a charming contrast. They are also charming for house culture in pots, blooming usually at Christmas. The Giant Snowdrops we offer are much superior to the common variety, producing larger flowers.

Giant Snowdrop Elwesi—A very large, tall variety; fine for cutting; flowers three times the size of ordinary single Snowdrops and sweet-scented. Price, 2 cents each, 15 cents per dozen, 90 cents per hundred, by mail.

Giant Double Snowdrop—Price, 3 cents each, 25 cents per dozen, $1.25 per hundred, by mail.

Try planting Scillas, Snowdrops and Chionodoxas between the bulbs in your Tulip or Hyacinth bed. They carpet the ground with bloom before the larger flowers bloom and the effect is beautiful.
ROMAN HYACINTHS

We wish to call special attention to these beautiful white Roman Hyacinths, which are so valuable for early winter blooming. They are among the few flowers which can be had as early as Christmas and New Year. Three can be planted in a four-inch pot, which, when in bloom, form a mass of waxy bells of unrivaled beauty and fragrance. Each bulb throws up several flower spikes. Don't fail to plant a quantity of them.

Single White Roman—The most popular of all. Every window should have several pots of these. Exquisite bells, white as the driven snow and pleasantly fragrant. Never fails to bloom. Price, 5 cents each, 50 cents per dozen.

Single Pink Roman—Exquisite delicate pink; very charming for early flowering in the house. Price, 5 cents each, 50 cents per dozen.

Single Blue Roman—Clear pale sky-blue; fine in contrast with white and pink. Price, 5 cents each, 50 cents per dozen.

FEATHER, OR COCKADE HYACINTHS

Of this elegant Hyacinth the spike of bloom resembles a feathery plume, and is of a fine blue color. The bloom first appears as a tassel about an inch or two long, of a rich blue color, and as it expands is marked with pink, and at the end of two months is developed into a beautiful plume, six inches in length, of exquisite coloring—pink, violet and blue. Desirable for both house and garden. The bulbs rapidly increase and are perfectly hardy. We have secured a fine supply this season. Price, 3 cents each, six for 15 cents, twelve for 25 cents.

FRENCH RANUNCULUS

Among dwarf flowers these are unrivaled for lovely form and bright and attractive colors of white, crimson, yellow, purple, black, many of them being beautifully marked. They flower profusely in pots in the house during winter or in open border in spring. Price, 3 cents each, 25 cents per dozen.

ANEMONES

Very beautiful and brilliant spring-flowering bulbs, which should be found in all gardens. Fine colors, such as brilliant scarlet, red, blue, rose, striped carnation, etc. For pot culture they are very fine.

Single—Mixed colors. Price, 3 cents each, 25 cents per dozen.

Double—Mixed colors. Price, 4 cents each, 35 cents per dozen.

It grows 3 to 4 feet high, and blooms in the open ground in June. When grown in bold masses or in rows these lilies are especially effective, the brilliancy of their snow-white flowers against the surrounding greenery of shrubs, grass and trees is very telling. This Lily dislikes being cold-dug, thriving best when it can remain undisturbed for years in good garden soil. **Price, 13 cents each; 4 for 50 cents.**

LILIUM HARRISII—(Bermuda Easter Lily)
Their profusion of bloom, the remarkably short time required to bring them into flower, and the certainty to produce abundant bloom, and also the ease with which they can be manipulated to be flowered at any desired period, such as Christmas, Easter and any other special occasions, renders them invaluable. The flowers are delightfully fragrant, pure waxy white, of great substance, and if cut as soon as they are open or partially open they can be kept for two weeks. The average production of bulbs five to seven inches in circumference is from five to eight flowers and of bulbs seven to nine inches eight to twelve flowers. DWARF CALLA "GEM"

Having given it a fair trial with the ordinary variety known as the Calla Lily, the only objection to the old variety is that it sometimes grows tall and scraggy; but the "Geming" is of strong and dwarf habit. The foliage is of a lustrous dark green, is produced in great profusion, being literally an ever-bloomer. Price, 15 cents each; two for 25 cents.

SPREKELIA FORMOSISSIMA (Mexican Scarlet Lily)

Any description would be inadequate to give a correct idea of the superb brilliancy of the flowers of this Lily. They are of a dark velvety-scarlet, shading to maroon and having a satiny-white stripe in the center of each petal. In form more graceful than any Lily we know of. If planted in the same manner as the Chinese Sacred Lily the blooms will appear much sooner, but will not last as long as when planted in earth. Try two or three of these bulbs planted together, and a gorgeous display is assured. Price, 15 cents each; two for 25 cents; three for 35 cents.

FINE MIXED GLADIOLI

Our mixed Gladioli embrace a magnificent variety of beautiful colors, all the poorer sorts having been discarded when in flower. The spikes of bloom, richness and brilliancy of color are out of all proportion to the trilling cost. NEW ORCHID CALLA (Arum Cornutum)

"A CHILD CAN GROW IT"

This wonderful bulb from South Africa, under certain conditions, grows without soil or water. The corm or bulb can be placed upon a mantal or a table in a living room and within a short time will start to grow and develop a long green shoot which grows very quickly, from which a large and wonderful flower, nearly 18 inches in height, unfolds; the color of the flower outside is silver-green, inside greenish-yellow with bright purple spots and the long pistil is shiny purple-black. After the plant has flowered the bulb can be planted in the garden or in a pot and placed in a greenhouse or living room; it will then develop immense foliage measuring nearly 3 feet in circumference. When the bulb has been harvested and thoroughly ripened it can again be developed in the preceding manner, either in a room or greenhouse, and soon the marvelous flower will again appear. (See Illustration.) Price, good bulbs, 15 cents each; extra large bulbs, 25 cents each.

THE GREAT DRAGON ARUM

This plant has the honor of producing the largest flower of any plant that is hardy in this country. They are simply enormous. The leaf stems and flower stalks are all spotted with purple, like an adder, and upon the tops of the latter opens a flower of gigantic size and curious color. On the outside it is of a light green color, while the inside is of a deep red-purple. The spadix in the center of the flower is of a glossy, purple-black color. Price, good bulbs, 15 cents; extra large bulbs, 25 cents each.

The Five Best Ramblers

RAMBLER ROSE LADY GAY

This new variety, a seedling from the popular Crimson Rambler, which it closely resembles in habit of growth and general effect, is destined to become one of the most popular of Ramblers, for which purpose it is especially adapted on account of its delicately tinted flowers, which are of a delicate cherry-pink, which gradually changes to a soft-tinted white. It is a strong, vigorous grower, with profuse, glossy, deep green foliage. Price, 15 cents each, two for 25 cents; strong two-year-old plants, 40 cents each.

CRIMSON RAMBLER

This plant is of a very vigorous growth, making shoots from eight to ten feet during the season, rendering it a charming pillar Rose. It is also magnificent in bush form, and for covering buildings, trellises, etc., it cannot be excelled. One of the striking characteristics of this Rose is the remarkable color, which is of the brightest crimson, which remains undimmed to the end, showing none of the objectionable purplish tints so common in Crimson Roses. The flowers are produced in great abundance on pyramidical panicles, or trusses, each carrying from thirty to forty blooms. One of its best features is that it will stand the most severe winter without protection. Price, 10 cents each; large two-year-old plants, 30 cents each; strong three-year-old stock, 50 cents each.

DOROTHY PERKINS

---

**FERNS FOR FINE SPECIMEN PLANTS**

**ELEGANTISSIMA OR TARRYTOWN**

A sport of the popular Nephrolepis Piersoni Fern. Much more beautiful, and an improvement over the Piersoni. Is more dwarf and compact, the fronds broader and only half the length. The small side pinnae, or leaflets, are subdivided into perfect miniature fronds; the side pinnae stand at right angles to the middle of the fronds, on edge instead of flat, giving both sides of the main frond the same beautiful appearance. It is impossible to conceive of the beauty and grace of this wonderful Fern from description—must be seen to be appreciated. Price, nice plants, 15 cents each; strong specimen plants, 50 cents each.

The New “Ostrich Plume” Fern

(Nephrolepis Piersoni)

An entirely new form of the famous Boston Fern. The fronds grow in the most luxuriant manner, the pinnae subdividing, making miniature fronds, which are superimposed on the main fronds, looking as if two, or even three, were condensed in one. They are graceful beyond description—feathery, plumy, nothing describes them better than “Ostrich Plumes,” which they very much resemble. The habit of the plant is grace personified. The fronds arch over in wavy irregularity, delightful to the eye. Price, strong young plants, 15 cents each; large, handsome plants from five-inch pots, 50 cents each.

**NEW NEPHROLEPS SCOTTI**

Of much dwarfer and bushier growth than the Boston Fern. The fronds grow gracefully, and are not as long and coarse as the Boston. It is a rapid grower, and to see it in all stages of growth, from a runner in the bench to a fourteen-inch pot specimen, will convince you that it will be in great demand as a house Fern. Price, strong plants, 35 cents each.

**BOSTON SWORD FERN**

The Boston Sword Fern

(Nephrolepis Exaltata Bostoniensis) A variation from the ordinary Sword Fern. These fronds arch and droop over very gracefully, on account of which it is frequently called the “Fountain Fern.” This drooping habit makes it an excellent plant to grow as a single specimen on a table or pedestal. Price, small plants, 10 cents each; large plants, 25 and 40 cents each.

**WHITMANII**

The Newest and Finest Fern Yet Introduced

This Fern makes its first appearance this fall, not having been offered until now by any firm. It is the best Fern of the Boston type yet introduced. It is somewhat similar to the Fern Tarrytown, but much more compact and shorter in its growth. Price, large specimen plants, 75 cents each.

**NOTICE**—This Fern will not be ready for shipment until November 1, 1907.

OUR LATEST NOVELTY,

Hydrangea “Aborescens Grandiflora Alba”

This beautiful, hardy American shrub is the finest addition to this class of plants found in many years. The blooms are very large, of pure snow-white color. Resembling a little the hardy shrub so well known, the Snowball, in color and make-up, only they are much larger in size and much more striking. One of its most valuable features is its coming into bloom just after the passing of all the early spring shrubs, while its long season of bloom, from early June through August, renders it a valuable plant not only to the florist but to the owner of every garden. It is perfectly hardy, standing 20 degrees below zero. The form of the panicle is much like the tender varieties of Hydrangeas. Its foliage is of a soft velvety texture not nearly as coarse as that of the Hardy Hydrangea Paniculata Grandiflora. This Hydrangea is bound to be the most widely grown and the most useful of all in the Hydrangea family. It will not only be a most valuable plant to every one buying from this catalogue, but the large florists and nurseryman will find it a valuable addition to his class of plants. Price, nice young plants, strong and healthy, 35 cents each, or 3 for $1.00.
